

# CONNECTIONS: ps:®macro-joint

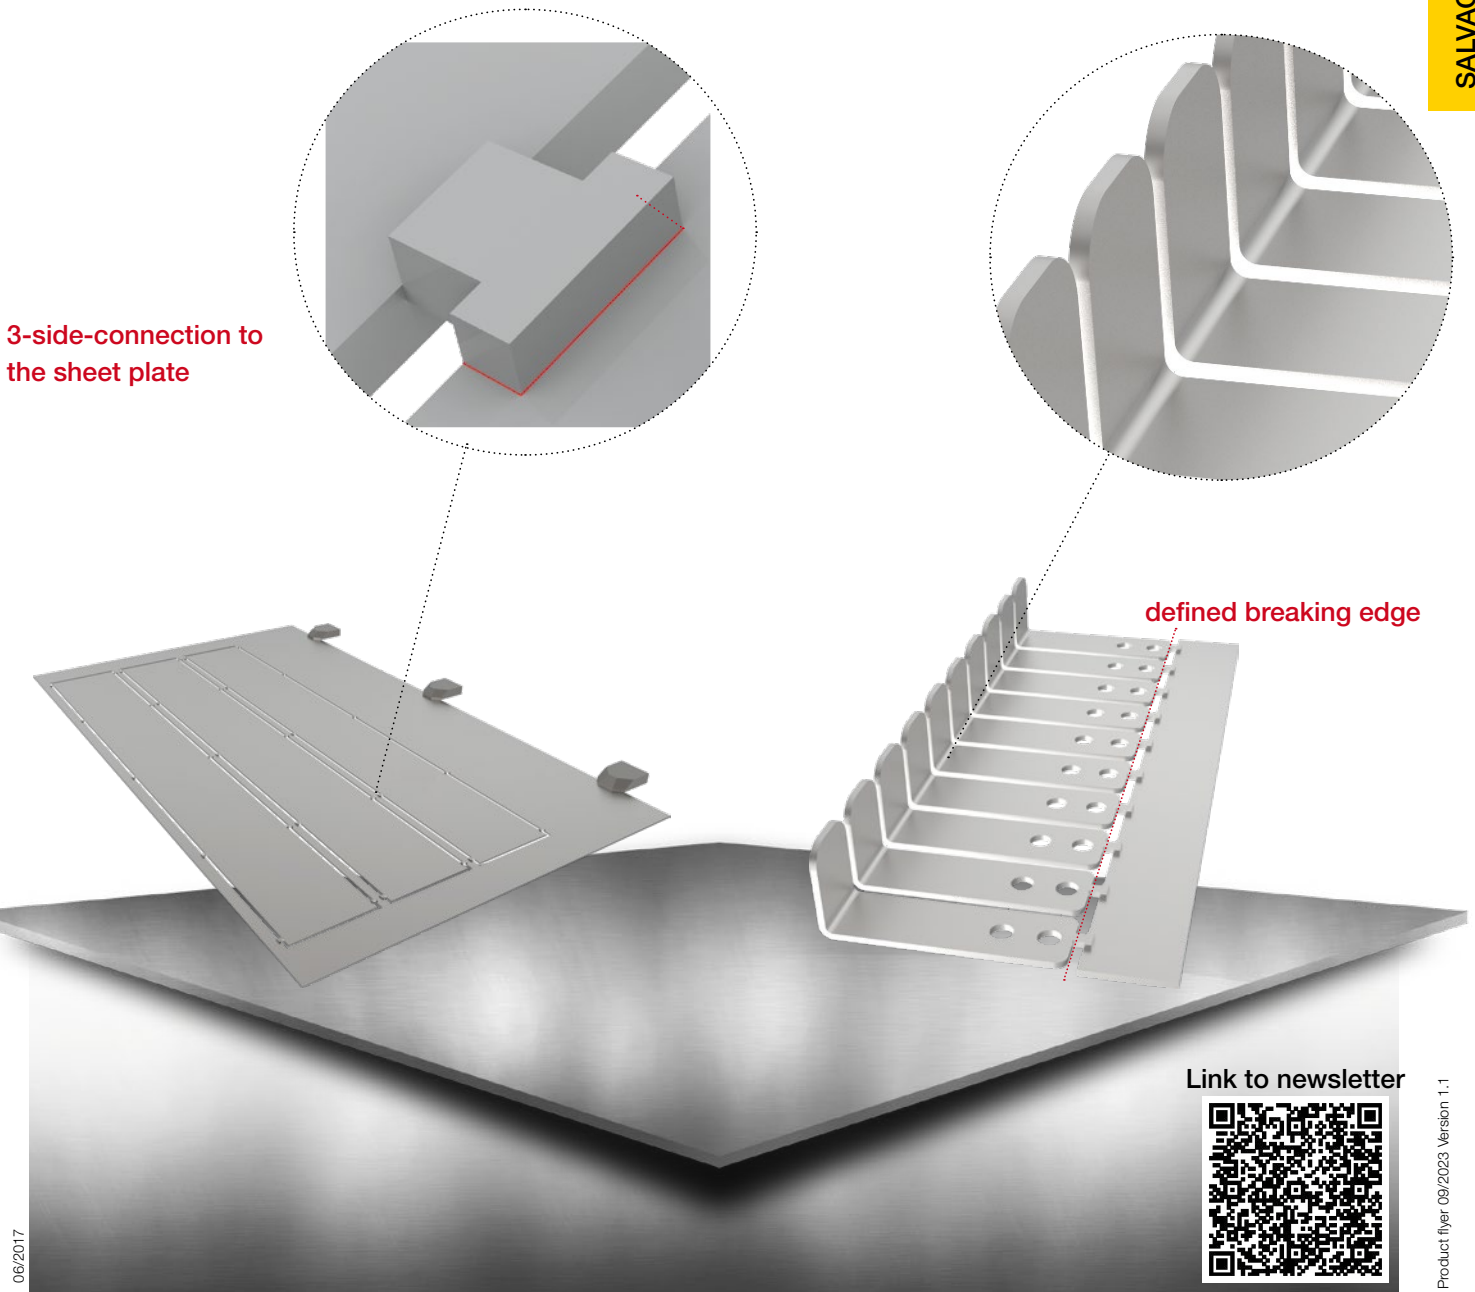

FOR MACHINE TYPES TRUMPF, THICK TURRET & SALVAGNINI

- for effective production with manual part extraction
- **ps:®macro-joint** connects individual parts on a sheet plate
- connecting bridges remain on the rest fence when the parts are broken out thanks to 3-side connection
- no waste of the machine table caused by slugs
- bending of several small parts together possible
- timesaving
- optimizing the production process
- trouble-free production process

TRUMPF

THICK TURRET

SALVAGNINI

3-side-connection to the sheet plate

defined breaking edge
